*On the issue of Energy Independence,*

# Senator Elizabeth Dole has a plan to help North Carolina and America . . .

Senator Dole co-sponsored a comprehensive proposal called the Gas Price Reduction Act that focuses on common sense solutions such as:

- ✓ Opening more areas offshore so the United States can harvest more of our domestic energy
- ✓ Lifting the moratorium on oil shale exploration in the Western United States
- ✓ Reducing our dependency on foreign sources of oil

*Not only will the proposal help reduce gas prices for North Carolina families, but it moves us toward energy independence making us safer and improving our environment.*

**Call Senator Dole at (919) 856-4630 and tell her to continue fighting for lower energy prices.**
